

Smart solutions for contributions!

Dynavision Contributions & Declarations streamlines the application and reporting of surtaxes (e.g. Bebat, Recupel, Stibat) within Business Central. It automates contributions on sales and purchase documents, reduces administrative overhead, and ensures regulatory compliance across jurisdictions.

Challenges addressed

- Manual surcharge management for regulated contributions
- Inconsistent application of surtaxes across documents and item types
- Limited visibility in reporting and reconciliation of surtax balances

Requirements Covered in Business Central Projects

- Configurable contribution types (e.g. Bebat, Recupel) with linked GL accounts
- Multiple contribution categories per type, customizable with text, descriptions and tariffs
- Auto-insertion of contributions on items or resources in sales/purchase documents
- Visibility via contribution analysis view and reporting pages, with Excel export and API endpoints for Power BI integration

Key features

- **Contribution Type Setup:** Define types, GL accounts, VAT settings and dimensions for fine-grained control
- **Category & Tariff Configuration:** Assign cost matrices and textual descriptions based on category, geography or item/resource type
- **Text & Commentary Lines:** Customize narrative text for customer-facing documentation
- **Item/Resource-Level Contributions:** Assign surtaxes at the item or resource level using base units, weight, volume or net/gross quantity calculations
- **Reporting & APIs:** Access contributions via list pages and use APIs for analytics or Power BI dashboards
