

Track, return, reuse packaging you won't lose.

Dynavision Reusable Packaging enables businesses to efficiently track crates, bottles, kegs, pallets, and other returnable packaging. Automate deposits, manage returns, and keep financial and logistical data in sync — all directly in Business Central.

Challenges addressed

- Manual tracking of returnable packaging
- Lost deposits and missing containers
- Disconnected systems for logistics and finance
- Customer disputes over returns

Requirements Covered in Business Central Projects

- Link reusable packaging to sales and purchase lines automatically
- Track open balances of returnable items by customer or vendor
- Set deposits with automatic financial postings
- Generate packaging movements and overviews per transaction
- Manage reusable packaging in sales, purchase, and service modules

Key features

- **Linked Items:** Automatically attach packaging items (e.g., crates, bottles) to products in sales/purchase documents
- **Deposit Management:** Define packaging deposits and automate the financial implications
- **Transaction-Based Return Tracking:** Monitor which items were returned and what remains outstanding
- **Reusable Packaging Ledger:** Get a clear overview per customer/vendor of reusable packaging balances
- **Audit-Friendly Reporting:** Transparent reporting for logistics, finance, and customer service
